SUMMARY

Motivated and detail-oriented Artificial Intelligence student with a strong interest in technology, data analysis, machine learning, and web development. Experienced in working on academic projects using Python, Pandas, Matplotlib, Excel, and Power BI, with knowledge of C++, HTML, CSS, JavaScript, and Bootstrap. Possess strong problem-solving, analytical, and organizational skills, with a passion for continuous learning and developing practical technical solutions. Eager to apply my knowledge, gain professional experience, and contribute to innovative projects.

EDUCATION

Bachelor of Artificial Intelligence 10/2023 – 2027
Qena National University Qena, Egypt

SKILLS

- Web Development: HTML5, CSS3, JavaScript
- Artificial Intelligence (AI)
- Basic Data Analysis
- Pandas
- Microsoft Excel
- Microsoft Word
- Time Management
- Quick Learning
- Machine Learning (ML)
- Programming Language: C++
- Python Basics
- Data Science
- Google Sheets
- Fast Typing
- Problem Solving
- Attention to Detail

LANGUAGES

- Arabic
- English

AWARDS

4th Place – Artificial Intelligence Department
Qena National University

COURSES

Web Designer
National Telecommunication Institute (NTI)

Artificial Intelligence (AI)
National Telecommunication Institute (NTI)

HCIP Artificial Intelligence (AI)
National Telecommunication Institute (NTI)

Data Analysis
Online

PROJECTS

Data Science Project
- Cleaned and organized a dataset using Python and Pandas.
- Performed data preprocessing and handled outliers.
- Analyzed numerical data to identify patterns and useful insights.
- Used Matplotlib to create data visualizations and present insights through charts.
- Tools: Python, Pandas & Matplotlib

Web Development Project
- Developed a responsive website using HTML, CSS, JavaScript, and Bootstrap.
- Created structured and user-friendly web pages.
- Implemented interactive elements using JavaScript
- Tools: HTML, CSS, JavaScript & Bootstrap

Data Analysis and Visualization Using Python
- Cleaned and processed a dataset to improve data quality and consistency.
- Performed exploratory data analysis (EDA) to identify patterns, trends, and relationships.
- Detected potential outliers and examined statistical distributions.
- Created visualizations using Matplotlib to communicate insights effectively.
- Summarized key findings to support data-driven understanding.
- Tools: Python, Pandas, Matplotlib & Seaborn

Machine Learning Project-Bank Marketing Prediction
- Explored and analyzed the Bank Marketing dataset.
- Performed data cleaning and preprocessing.
- Visualized data to identify patterns and trends.
- Applied categorical data encoding techniques.
- Used feature scaling to prepare data for training.
- Built multiple classification models.
- Implemented Logistic Regression and KNN.
- Trained SVM and Decision Tree models.
- Applied Random Forest for classification.
- Evaluated models using Accuracy, Precision, Recall, and F1-score.
- Analyzed model performance using Confusion Matrices.
- Tools**:** Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn.
